

CoLibri Book Covering System

Cover your books in 4 easy steps:

- 1) Select a cover slightly larger than the size of your book and place on the work surface. Insert the back cover of the book into the right pouch pocket as far as possible, aligning bottom of book cover with the bottom of the pouch.
- 2) Slide the excess pouch material at the top of the book under the sealing bar, using grid marks on machine surface to keep book aligned. Press down machine lever. Machine will seal top of pouch and remove excess material.
- 3) Insert front cover of the book into left pouch pocket and close book. Slide excess pouch material under the sealing bar to weld and trim side edges.
